

Alert Triage Analysis – SSH Brute Force Attempt

Alert ID	Alert Description	Source IP	Priority	Status
003	Multiple Failed SSH Login Attempts	192.168.1.100	Medium	Open

Initial alert analysis indicates repeated unauthorized login attempts on the SSH service from a suspicious internal IP address. Threat intelligence lookup suggests the activity may be related to brute-force behaviour. Further monitoring and temporary IP blocking is recommended to prevent unauthorized access.
