

Incident Classification Example

Incident Type: Phishing Attack
MITRE ATT&CK Technique: T1566 (Phishing)
Source IP Address: 185.22.45.12
Target Department: Finance Department
Impact: Risk of user credential compromise
Detection Time: 10:05 AM
Status: Under Investigation

An employee of the organization received a suspicious email containing a potentially malicious link. The Security Operations Centre (SOC) monitoring system detected unusual email activity and generated an alert. Initial analysis confirmed that the email was part of a phishing attempt. The affected user's system was isolated immediately to prevent further compromise, and a detailed investigation was initiated by the SOC team.
