

Incident Response Report – Phishing Attack

- 1. Executive Summary**
 - 2. Timeline of Events**
 - 3. Impact Analysis**
 - 4. Containment Actions**
 - 5. Eradication Steps**
 - 6. Recovery Process**
 - 7. Lessons Learned**
-

1. Executive Summary

A phishing email targeting an employee in the finance department was detected by the SOC monitoring system. Immediate action was taken to isolate the affected endpoint and prevent potential credential compromise.

2. Timeline of Events

- 10:05 AM — Suspicious email alert generated
- 10:10 AM — Initial triage performed by SOC analyst
- 10:15 AM — User system isolated from network
- 10:30 AM — Malicious email removed and IOC analysis started

3. Impact Analysis

The incident posed a moderate risk to organizational security due to the possibility of credential theft. No confirmed data breach was observed.

4. Containment Actions

The affected workstation was disconnected from the network. Email access was temporarily restricted and malicious sender domain was blocked.

5. Eradication Steps

Malicious email artifacts were removed and system was scanned using endpoint security tools to ensure no persistence mechanisms remained.

6. Recovery Process

User credentials were reset and the system was safely reconnected to the corporate network after validation.

7. Lessons Learned

Employee awareness training and advanced email filtering controls should be strengthened to reduce phishing risks.
