

# Automated Alert Triage Report

---

## Section 1 — Alert Details

| Alert ID | Description              | Source IP     | Priority | Status |
|----------|--------------------------|---------------|----------|--------|
| 005      | Suspicious File Download | 192.168.1.102 | High     | Open   |

## Section 2 — Analysis

The alert indicates a suspicious file download activity from an internal system. This behaviour may be associated with malware delivery or unauthorized file access.

## Section 3 — Automated Validation

The alert was automatically validated using Virus Total integration. The file hash was checked against threat intelligence databases, and results indicated potential malicious activity.

## Section 4 — Conclusion

Automation helped speed up the triage process and reduced manual effort while ensuring accurate validation of suspicious activity.
