

Digital Evidence Analysis Report

Section 1 — Evidence Details

Evidence Item	Description	Collected By	Date	Hash Value
Network Logs	Server-Z Network Activity	SOC Analyst	18 Aug 2025	ABC123XYZ
Process Data	Running Processes Snapshot	SOC Analyst	18 Aug 2025	XYZ789ABC

Section 2 — Analysis

Analysis of network logs revealed suspicious outbound connections to unknown external IP addresses. Process data indicated abnormal processes running in the system, which may be linked to malicious activity.

Section 3 — Chain of Custody

All evidence was collected and handled following proper forensic procedures to ensure integrity and authenticity for further investigation.

Section 4 — Conclusion

The analysed evidence suggests potential compromise and highlights the importance of continuous monitoring and forensic readiness.
