

Post-Incident Analysis and Root Cause Report

Section 1 — Incident Summary

A phishing attack was identified within the organization targeting an internal user. The attack involved a malicious link that led to potential credential compromise. The incident was detected and handled by the SOC team.

Section 2 — Root Cause Analysis (5 Whys)

Question	Answer
Why did the incident occur?	User clicked malicious link
Why was the link clicked?	Lack of awareness
Why was email delivered?	Weak email filtering
Why was filtering weak?	Misconfigured security rules
Why misconfiguration existed?	Lack of regular review

Section 3 — Metrics (MTTD & MTTR)

- Mean Time to Detect (MTTD): 2 hours
- Mean Time to Respond (MTTR): 4 hours

Section 4 — Analysis

The incident revealed gaps in email security and user awareness. Detection and response times were within acceptable limits but can be improved with better automation and monitoring tools.

Section 5 — Lessons Learned

Improved email filtering, regular security audits, and employee awareness training are essential to prevent similar incidents in the future.
